

Exercise 1

Now the government wants to look into how many companies applied for grants in each county during 2009-2013 in different programs (OneNC or JDIG).

The NC grant manager wants to see a simple Power BI report of:

- Count of **Company** by **Funding County** (bar chart)
- Sort **Funding County** by the count of **Company**
- Adding **Award Date** as the slicer to select the particular time period.
- Adding **Program** as the slicer to select the different program.

Save the file as '**Exercise 1 Complete**' and publish to the reporting server.

Questions

- 1) Which county had the most companies apply for grants in 2011?

Mecklenburg County has the highest count of companies in 2011 with eleven (11) observations.

- 2) How many companies applied for the OneNC program in 2010 in different counties? Use slicer to find the answer.

Looking at the top three countries for the OneNC program in 2010 are as followed: Davidson (5), Mecklenburg (5), Buncombe (3)
